## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-10 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The present invention features determining device and method for determining whether a virtual address corresponds to a physical address in a TLB, the virtual address comprising a plurality of bits, the translation lookaside buffer (TLB) comprising a plurality of tag addresses and page types, and the physical addresses corresponding to each tag address,

However, applicant's arguments cover the reasons for allowing the claims as none of the prior art of record teaches or suggests: adjusting the rank of a page type if the page type of a virtual address in step of setting the page type of the virtual address according to the rank of the page types and the tag compared bit in the step of fetching index bits and a tag compared address from the page type correspond with a page type and a tag address in the TLB.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
